 ACHIEVEMENT USAII Global AI Finalist	 LEADERSHIP Developer Head	 PROBLEM SOLVING 110+ LeetCode Solved	 RESEARCH Research & Innovation
---	--	---	---

PROFESSIONAL SUMMARY

First-year Computer Science (AI/ML) undergraduate specializing in product engineering, building scalable full-stack applications and AI-powered systems. Combines rigorous technical execution across infrastructure dashboards and operational software with strong product thinking. Proven leader currently serving as NEX-CELL Developer Head, coordinating team architecture, implementation, and deployment, and recognized globally as a finalist at the USAII Global AI Hackathon.

PROJECTS

VIGIL

AI Infrastructure Monitoring Platform

Frontend & Visualization Lead — Far Away Hackathon

Problem Infrastructure monitoring systems lack unified, real-time AI-driven operational insight across multiple critical components simultaneously.

Contribution Designed and built the frontend visualization layer for the Vigilant Infrastructure Guardian Intelligence Layer (VIGIL) across five components: interactive main dashboard, risk heatmap, live alert feed, agent activity log, and system module status view. Integrated dashboards with FastAPI endpoints to surface AI-generated insights in real time.

Outcome Successfully demonstrated an end-to-end AI-powered infrastructure monitoring workflow during the hackathon final presentation.

LifeLens

AI-Powered Career & Education Decision Support Tool

AI Workflow & Presentation Lead — Global AI Finalist (Rank #43/424, Top 10%)

Problem Students lack objective, unified methods to evaluate complex career paths and higher education alternatives.

Contribution Designed the decision logic, AI reasoning workflow, and evaluation framework guiding AI-assisted career and education comparisons.

Outcome Placed in the top 10% globally at the USAII Global AI Hackathon 2026 out of 424 international teams.

Inventory Management System

Inventory Management Platform

Full-Stack Developer

Problem Manual inventory processes lack centralized tracking and reliable record management across CRUD operations.

Contribution Developed a centralized inventory platform using MVC architecture. Designed MongoDB schemas to maintain consistent inventory records across all operations.

Outcome Improved maintainability through MVC architecture and structured data modelling.

PROJECTS (CONTINUED)

Academic Administration Portal

2026

Academic Administration Platform

Full-Stack Developer

- Problem**
- Academic institutions rely on fragmented record-keeping that lacks validation, maintainability, and data security.
- Contribution**
- Built a structured administration hub managing academic records using MVC design pattern and Mongoose validation to secure student logs.
- Outcome**
- Improved maintainability and consistency through schema validation and structured application architecture.

Mongoose

EJS

LEADERSHIP

Developer Head

2025 – Present

NEX-CELL Entrepreneurship Club

- Directing the technical roadmap and engineering execution for NEX-CELL's digital platforms, establishing the system architecture and leading frontend, backend, and deployment phases across a 9-member developer team.
- Engineering the institutional website in Next.js and Tailwind CSS, including design of a multi-role administrative portal.

RESEARCH & INNOVATION

CONCEPT STAGE — 2026

2026

Pranati

AI Citizen-Science Platform for Air Quality Monitoring

Team Lead & Principal Inventor — Invention Disclosure Draft

- Formulated the core technical system mapping leaf metrics from smartphone photographs to compute hyperlocal air quality estimates.
- Co-authored the team's draft Invention Disclosure and led product planning and system workflow design.

TECHNICAL SKILLS

Languages	C++	Python	JavaScript	HTML5	CSS3
Frameworks & Frontend	React	Next.js	Tailwind CSS	Recharts	EJS
Backend	Node.js	Express.js	FastAPI	REST APIs	
Databases	MongoDB	Mongoose			
Data Science	NumPy	Pandas	Matplotlib	Seaborn	scikit-learn
Developer Tools	Git	GitHub	VS Code	Postman	
AI & LLM Tools	Prompt Engineering	LangGraph	OpenAI API	AI API Integration	
Core Computer Science	Data Structures & Algorithms	OOP	MVC Architecture	REST API Design	

EDUCATION

B.Tech, Computer Science Engineering (AI/ML)	2025 – 2029
Mirai School of Technology	
Class XII (CBSE)	2024
Podar International School, Surat	
Class X (CBSE)	2022
Podar International School, Surat	

CODING PROFILES

GitHub dadhichtejas653-a11y	LeetCode 110+ solved
CodeChef 1100+ rating	Codeforces 900+ rating

USAII Global AI Hackathon 2026
Rank #43 / 424 international teams — Top 10% globally
